Project Name	Project – skill and job recommender
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- **Responsible for assisting in the establishment of an gob architecture practice,And the adoption of an architecture and standards methodology.**

- **Manage activities that take place during solution ideation,solution design and solution implementation.**

- **Communicates the architecture to the stakeholder and collabotrate and coordinate with exting domain architecture in the formalization and adoption of JOB standards procedures.**

- **Assures solutions not only are fit for the specific purpose but also closely align with the standards guideline of technology solution.**

- **User input the hosted application to the store the chat conversation and search the job .**
